Cool. I'll be on leave as well.

Hey, thanks for the input at SMT earlier today!

Hi Deldi

I'll be out on leave on the 28th but can/will work with Dan and Steve before then to help ensure that call goes smoothly.

Thanks

John

DTSC has floated two dates, one of which does not work for Steve Calanog.

How about Friday the 28th of October? That works for Dan and Steve, I believe.

Dear R7 colleagues, thank you all for your patience on this and your willingness to help us in our efforts with DTSC.

I understand now that Gene and John Lyons have checked in by phone and we have a new plan with regard to checking in with the LA County and DTSC crew—no need to respond in writing.

Rather, we will have a **R9/R7 led conference call** with DTSC and LA County. In addition to engaging with them on the four topics they've provided, we will work toward making sure they come to R9 in future for such issues.

So now we turn to scheduling! From R9's end, we will coordinate around schedules for Dan Meer and Steve Calanog. Who from your end would be most essential to the discussion? Ideally, for scheduling purposes this can be a bit smaller than when we had the first call.

I will be around today until 3 or so and although I'm on leave this week, I can monitor emails to see this through until Steve Calanog is back on Oct 24th to pick it up.

Thanks again.

Deldi

Hi Deldi

Steve Kemp forwarded your email to me. I can answer these questions for you.

I think I can send answers to you end of this week. Soon enough?

FYI. It looks like most of these are issues for you Don. You may want to call her back. I won't be available until after next week. I'm in SEMO next week.

Subject: Checking in again, this time with topics from LA County re Exide clean up

Dear Steve, I am hearing again from our colleagues at DTSC and the County about checking in with you. We are sensitive to the demand this request places on you all so I've been trying to narrow down their interests. I was able to get the four topics below from them as ones they want to discuss.

I also went back to my patchy notes from the webinar and it looks like item 4 was covered then. Perhaps instead of getting your whole group together, you may want to point us to the relevant docs you've previously shared with us (if that's appropriate) or perhaps draft a basic response?

If you'd rather not weigh in in writing, they are certainly eager for a phone call and perhaps with this list, you may not need everyone on your team? I know that's a scheduling nightmare.

Topics or areas of interest

1. Interior lead assessment and clearance process
2. Public release of lead levels on each property
3. Lead based paint stabilization
4. Confirmatory sampling after soil remediation

From my notes from our webinar:

5) Did you do confirmatory sampling in homes post-cleanup? If you did, what were the levels and what clearance levels did you use (I assume you used the 40 ug R&R standard, but I want to verify).

With respect to dust sampling inside homes, no. We had an agreement with the county for dust sampling. And this was all voluntary on the part of residents, if they wanted the sampling.
